

6 EARING INFORMATION WORKSHEET

We are processing a shipment for your company which contains bearings. In order to determine the classification and applicability of anti-dumping duties, please provide the requested information for each bearing. **Release of imporations could be delayed unless this information is provided.** Please provide your response directly on this worksheet and return it via facsimile. Your prompt attention to this matter is appreciated, should you have any questions, please contact our office.

BALL BEARING TYPES:		ROLLER BEARING TYPES:	
B-1	Ball bearing with integral shaft (ADDITIONAL INFORMATION NEEDED: provide outside diameter in mm)	R-1	Tapered / Cup and cone assemblies entered as a set / Wheel Hubs (flanged)
B-2	Unground bll bearing	R-2	Tapered / Cup and cone assemblies entered as a set / Wheel Hubs (not flanged)
B-3	Thrust (axial) ball bearing	R-3	Tapered / Cup and cone assemblies entered as a set / Other than Wheel Hub (ADDITIONAL INFORMATION NEEDED: provide outside diameter of cup in mm)
B-4	Linear ball bearing		
B-5	Angular Contact / Wheel hub bearing (flanged)	R-4	Tapered / Cup and cone assemblies entered separately (ADDITIONAL INFORMATION NEEDED: provide outside diameter in mm of cup that would fit the imported cone)
B-6	Angular Contact / Wheel hub bearing (not flanged)		
B-7	Angular Contact / Other than wheel hub	R-5	Spherical roller bearing/single row
B-8	Radial / Single row / maximum or full capacity type	R-6	Spherical roller bearing/ other than single row
B-9	Radial / Single row / other than full capacity (ADDITIONAL INFORMATION NEEDED: provide outside diameter in mm)	R-7	Needle roller bearing (ADDITIONAL INFORMATION NEEDED: provide Length and Diameter of the ROLLER (not the entire bearing) in mm)
B-10	Radial / Double row		
B-11	Radial / Other (ADDITIONAL INFORMATION NEEDED: provide description or diagram)	R-8	Cylindrical roller bearing (ADDITIONAL INFORMATION NEEDED: provide Length and Diameter of the ROLLER (not the entire bearing) in mm)
B-12	Other type of ball bearing (ADDITIONAL INFORMATION NEEDED: provide description or diagram)		
COMBINED BALL / ROLLER BEARING TYPES:		PLAIN SHAFT BEARINGS (BUSHINGS):	
C-1	Ball and Spherical	P-1	Spherical Plain
C-2	Ball and Needle	P-2	Other (ADDITIONAL INFORMATION NEEDED: provide description or diagram)
C-3	Ball and Cylindrical		
C-4	Other combined (ADDITIONAL INFORMATION NEEDED: provide description or diagram)		

*Please provide the following information for each part number listed.
For bearing type, list the number above, ex Linear Ball Bearing would be "B-4".*

Part #	Bearing Type (see above)	Manufacturer	Country of Production	Additional Information (see above)	Are they Housed? (yes or no)

Signature: _____ **Date:** _____

Title: _____ **Company:** _____
